

Muhammad Khaled Essa

Flutter Developer | Mobile App Developer (Junior)

Giza, Egypt | +20 102 903 6889 | muhammadbenkhaled@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Junior Flutter Developer with hands-on experience building 4+ cross-platform mobile and web applications using Clean Architecture, MVVM, Bloc/Cubit state management, Firebase backend services, REST API integration, and responsive UI design. Completed an intensive 6-month Flutter Development training program with the Digital Egypt Pioneers Initiative (DEPI), Ministry of Communications and Information Technology, where a team project won Best Project in the cohort. Strong foundation in software engineering best practices, dependency injection (GetIt), local data persistence (Hive, SQLite, Shared Preferences), and Agile collaboration. Seeking a Junior Flutter Developer role (Remote / On-site / Hybrid) with companies in Egypt, UAE, Saudi Arabia, or Kuwait.

TECHNICAL SKILLS

Languages: Dart, Java, Kotlin (basic), Python (basic)

Mobile Development: Flutter, Responsive UI, Adaptive UI, Cross-Platform Development (Mobile, Web, Desktop/Windows)

State Management: Bloc, Cubit

Architecture: Clean Architecture, MVVM, Feature-First Structure, SOLID Principles

Backend & APIs: REST API Integration, Firebase Functions

Firebase: Authentication, Firestore, Realtime Database, Cloud Messaging (FCM), Storage, Crashlytics, Analytics

Local Databases: Hive, SQLite, Shared Preferences (Offline-First Apps)

Dependency Injection: GetIt

Version Control: Git, GitHub

Tools & Practices: Postman, Push Notifications, App Publishing, Agile Methodology, Software Engineering Best Practices

EXPERIENCE

Flutter Developer Trainee (Digital Egypt Pioneers Initiative – DEPI)

Ministry of Communications and Information Technology, Egypt (Remote) | Aug 2025 – Feb 2026

- Completed an intensive 6-month Flutter Development training program covering Dart, Clean Architecture, Bloc/Cubit state management, Firebase, REST APIs, and Agile software development practices.
- Collaborated within a 4-member development team to design and build a full mobile application, developing both UI components and business logic layers using Flutter and Bloc.
- Delivered the top-performing graduation project among all teams in the cohort, recognized as the Best Project of the initiative.
- Applied Clean Architecture and Feature-First structuring to maintain a scalable, testable, and maintainable codebase.

PROJECTS

Gym Management App ([Personal Project](#) / [Link of project here](#))

- Built a full gym management mobile application independently, end-to-end, addressing real gym workflow problems: digitizing attendance tracking (replacing paper sign-in sheets), in-app membership/subscription record management, and a built-in equipment catalog (shakers, gloves, supplements) for members to view and request.
- Implemented Clean Architecture with Bloc/Cubit state management and Dependency Injection (GetIt) for a scalable, decoupled codebase.
- Integrated Firebase services for authentication, data storage, and real-time data synchronization.
- Designed a fully responsive UI adaptable across multiple device sizes.

E-Commerce Store App ([Personal Project](#) / [Link of project here](#))

- Developed a complete e-commerce mobile application independently for browsing and purchasing clothing and footwear, covering product listings, cart, and order flows.

- Architected the app using MVVM and Bloc state management, integrating REST APIs for dynamic product data, cart operations, and order processing.
- Built a fully responsive UI ensuring consistent user experience across different screen sizes.

Responsive Admin Dashboard ([Personal Project /Link of project here](#))

- Built a cross-platform admin dashboard UI running on Mobile, Web, and Windows from a single Flutter codebase.
- Implemented a comprehensive library of responsive and adaptive widgets and layouts, ensuring consistent admin experience across screen sizes and platforms.

Muslim Werd App (Islamic Daily Companion) ([Personal Project /Link of project](#))

- Developed an Islamic lifestyle mobile app independently, providing users with daily Quran reading (Werd), essential Azkar (remembrances), and a built-in live Quran radio stream.
- Implemented Clean Architecture with Bloc state management and local database persistence for offline access to daily content.

EDUCATION

Bachelor of Computer Science – Faculty of Computers and Artificial Intelligence

Beni-Suef University, Egypt | Graduated 2024 | Grade: B+

- Graduation Project: Developed a simple chemistry virtual laboratory application for students ([Link project here](#)).

CERTIFICATIONS & TRAINING

- Flutter Development Track – Digital Egypt Pioneers Initiative (DEPI), Ministry of Communications and Information Technology (Aug 2025 – Feb 2026)

LANGUAGES

- Arabic – Native
- English – Intermediate
